

I am in sales and spend an huge amount of time traveling in my. Most of my travel is in NYC and Northern NJ where traffic is a major concern. Now that XM offers me the ability to hear EXACT, UP TO THE MINUTE reports of travel and advisories I am much better able to perform my job.

Other stations, be they AM or FM only do traffic at pre-set times and are often not up to the minute and/or accurate.

Please do not make me lose the edge that I have found - great music, talk and now weather and traffic!
